

embedded conduit inlet system for the application of SLIPSIL® plugs

CSD® embedded conduit inlet system made of impact resistant plastic (light blue colour)

fitting CSD® conduit inlet type CSD ... CI

ducted pipe or cable

fitting CSD® conduit inlet type CSD ... CI

CSD® adjustment pipe type CSD ... AP

CSD® adjustment pipe or set of CSD® adjustment pipes connected with CSD® connector pieces (CSD ... CP) to fit the set to the thickness of the wall/floor

CSD® adjustment pipe is cut to size prior to install the set in the casing for casting concrete.

CSD® conduit inlets preferably placed at both sides of the wall/floor. In case of limited thickness, an inlet may be installed at one side with an adjustment pipe to fit total thickness.
